

1. COURSE

CS361. Topics in Artificial Intelligence (Elective)

2. GENERAL INFORMATION

2.1 Credits	:	4
2.2 Theory Hours	:	2 (Weekly)
2.3 Practice Hours	:	2 (Weekly)
2.4 Duration of the period	:	16 weeks
2.5 Type of course	:	Elective
2.6 Modality	:	Face to face
2.7 Prerequisites	:	CS261. Intelligent Systems. (7 th Sem)

3. PROFESSORS

Meetings after coordination with the professor

4. INTRODUCTION TO THE COURSE

It provides a set of tools to solve problems that are difficult to solve with traditional algorithmic methods. Including heuristics, planning, formalisms in the representation of knowledge and reasoning, machine learning techniques, techniques applicable to action and reaction problems: as well as the learning of natural language, artificial vision and robotics among others.

5. GOALS

- Take an advanced course in Artificial Intelligence suggested by the ACM/IEEE curriculum.

6. COMPETENCES

- a) An ability to apply knowledge of mathematics, science. (**Usage**)
- h) A recognition of the need for, and an ability to engage in life-long learning. (**Usage**)
- i) An ability to use the techniques, skills, and modern computing tools necessary for computing practice. (**Usage**)
- j) Apply the mathematical basis, principles of algorithms and the theory of Computer Science in the modeling and design of computational systems in such a way as to demonstrate understanding of the equilibrium points involved in the chosen option. (**Assessment**)

7. SPECIFIC COMPETENCES

■NoSpecificOutcomes■

8. TOPICS

Unit 1: (60)	
Competences Expected: a,h	
Topics	Learning Outcomes
<ul style="list-style-type: none"> • Intelligent Systems. • Automated Reasoning. • Knowledge Based Systems. • Machine Learning. [RN03],[Hay99] • Planning Systems. • Natural Language Processing. • Agents. • Robotics. • Symbolic Computing. • Genetic Algorithms. [Gol89] 	<ul style="list-style-type: none"> • To deepen in several techniques related to Artificial Intelligence. [Usage]
Readings : [RN03], [Hay99], [Gol89]	

9. WORKPLAN

9.1 Methodology

Individual and team participation is encouraged to present their ideas, motivating them with additional points in the different stages of the course evaluation.

9.2 Theory Sessions

The theory sessions are held in master classes with activities including active learning and roleplay to allow students to internalize the concepts.

9.3 Practical Sessions

The practical sessions are held in class where a series of exercises and/or practical concepts are developed through problem solving, problem solving, specific exercises and/or in application contexts.

10. EVALUATION SYSTEM

***** EVALUATION MISSING *****
